

Dunnottar Nursery

Infection Control Policy

Policy Statement

We are required to protect the health, safety and welfare of all users and employees as well as a duty of care to ensure that we are promoting the health and wellbeing of everyone who is connected to our nursery.

In addition to this the prevention and control of infection is essential in helping to establish a safe and secure environment in which children can learn and develop through play. This has become more of a focus for our service as we respond to the Corona virus pandemic.

Health and Social Care Standards My support, My life 2017, Scottish Government. As part of being registered with the Care Inspectorate, we must comply with this document and illustrate the standards within our nursery.

3.14 I have confidence in people because they are trained, competent and skilled, are able to reflect on their practice and follow their professional and organisational codes.

4.11 I experience high quality care and support based on relevant evidence, guidance and best practice.

5.18 My environment is relaxed, welcoming, peaceful and free from avoidable and intrusive noise and smells.

5.22 I experience an environment that is well looked after with clean, tidy and well maintained premises, furnishings and equipment.

Aims

As a nursery team we are responsible for implementing our infection control knowledge that we have gained through training and applying it to the daily routines and practices within our nursery. We take this responsibility seriously and this has become more of a focus due to our response to dealing with the Corona virus pandemic. By following our infection control procedures that have been written from best practice guidance ensures that we are keeping our children and staff as safe as possible while reassuring our families of the practical procedures that we are following to comply with Government and local guidance.

Children have the right to good quality health care – the best health care possible – to safe drinking water, nutritious food, a clean and safe environment, and information to help them stay healthy. Rich countries should help poorer countries achieve this. (United Nations Conventions on the Rights of the Child - Article 24)

This policy has been enhanced by the creation of, *Covid-19 Daily Routines Policy (August 2020)* The following procedures below are still valid, the Covid-19 Daily Routines Policy document the additional procedures that we are implementing to

comply with Government and local authority guidance. The *Cleaning Overview and Schedule* complement this policy and the *Covid-19 Daily Routines Policy*.

Procedures

Minimise sources of contamination

- Staff are required to maintain their food hygiene and infection control certification.
- Food that requires refrigeration is kept in own packaging and then enclosed in an airtight bag and labelled with an opened date and use by date within the refrigerator, at a temperature of between 1°C and 4°C.
- Long hair is tied back during food preparation/serving.
- Hands are washed before and after handling food.
- Staff will wear IIR medical grade face masks when handling and preparing food.
- Food storage and preparation areas are cleaned with hot soapy water followed by an anti-bacterial clean.
- Food is purchased from reputable sources and used by the recommended date.
- Personal protective equipment (PPE), specifically gloves are stored in the original box to ensure identification of batch number and expiry date. All PPE is stored in a cupboard or drawer to prevent environmental contamination. The Medical and Healthcare products Regulatory Agent www.mhra.gov.uk is checked termly to ensure awareness of any safety alerts linked to gloves in use by setting.

To control the spread of infection

- Good hand washing procedures are adhered to.
- Children will wash their hands before eating, handling food and drink and after playing outside.
- Children are supervised/supported to wash their hands after snack and before using the sand, water and playdough. Any visible cuts on hands are covered.
- Children are supervised/supported to blow and wipe their own noses with tissues which are disposed of hygienically and then to wash their hands.
- Records are kept of:
 - The temperature in the fridge and freezer.
 - Washing of toys.
 - Cleaning children's toilets.

- Checking the outside play area before each session.
- Different cloths are kept for different areas and are laundered/replaced daily. Clean cloths are used for each session. Blue cloths are used for the kitchen area and yellow cloths for the messy play area.
- Sand trays covered when not in use, sand spillages are discarded, and sand replaced at the end of each term or sooner if necessary.
- Water trays are emptied after each session, cleaned with warm soapy water and dried with disposable paper towels.
- Playdough is stored in an airtight container overnight and replaced weekly or sooner if necessary.
- Personal protective equipment (PPE) is worn when preparing food and dealing with intimate care needs. Blue aprons are designated for kitchen use and white aprons for intimate care needs.
- Changing mat is cleaned between the morning and afternoon class and before and after each use.
- Any blood or bodily fluids spillages are dealt with as quickly as possible: children are kept away from the spill, PPE is worn, paper towels are placed over the spill to soak up the spillage then these are sealed and double bagged and placed in the designated disposal bin. A disinfectant solution is used to clean the remainder of the spillage. The area is wiped dry with paper towels. PPE is removed and put in a plastic bag, secured and sealed before being placed in the nappy bin. Nappies are bagged and placed in the designated nappy bin located in the changing room. Staff wash their hands with liquid soap and running water.
- Windows and doors are kept open to ventilate the nursery room as a control measure to reduce the potential spread of infection.

To raise awareness of hygiene procedures

- Inform all staff of the requirement to keep up to date with current training.
- Ensure new staff/students are aware of the existing policies and procedures.
- Provide visual instructions where possible for ease of understanding.
- Talk to the children about hand hygiene, use of tissues and have child friendly visual instructions around sinks.

To prevent cross contamination

- Ensure that adults and children have separate toilet facilities.
- Use of disposable wipes and paper towels in toilet areas.

- Different cloths are used for different areas and are replaced between each cleaning session.

To prevent the persistence and further spread of infection

- It is the duty of staff to report illnesses and infections to their line manager.
- Toilet seats, flush handles, toilet doors and sinks are wiped between sessions using antibacterial wipes/spray.
- Dedicated hand washing sinks are clearly marked.
- Staff to be vigilant to signs of infection and outbreaks reported to the Senior Leadership Team who should follow the school's infection control policy measures
- Ask parents to keep children at home if they have infections and to inform the nursery as to the nature of the infection.
- Children should not return to Nursery until 48 hours after the systems have passed if they have been off with sickness or diarrhoea. For information regarding to other communicable diseases then refer to the www.nhsgrampian.org.uk exclusion policies for infectious diseases (a printed copy is available in the school office)
- Staff, children and parents/carers **should not** come to nursery if they or someone in their household has developed symptoms (new persistent cough, fever or loss of, or change in, sense smell or taste). They should self-isolate straight away, stay at home and arrange a test via www.nhsinform.scot or the staff referral portal.

Training

REHIS Elementary Food Hygiene

REHIS Infection Control

HH 103 Covid Guard training video – dilution rates and how to use the product. Product to be sprayed directly on to large surfaces, product to be sprayed on to a clean cloth for smaller surfaces/high frequency touch points.

PPE - training on how to put on and remove PPE

Skin Surveillance Course on ALDO – September 2020

Policy Review

Date of Issue: August 2020

Date of Review: February 2021

Policy Author: Caroline Duncan (DHT)

This policy will be reviewed regularly and in response to accident, incident or change in National or Local policy or guidance.
